

Exact deployment and trust boundaries

MODEL / ACCESS	gemini-3.5-flash - Vertex AI global access
AGENT FRAMEWORK	Google ADK 1.35.1 / Vertex AI
CLOUD HOST	Cloud Run-hosted agent - us-central1
INTERLOCK APPLICATION BOUNDARY	Interlock MCP proxy
DECISION / RECEIPT	ALLOW + authorization receipt
PROTECTED TARGET	Protected target mutation
INDEPENDENT OBSERVATION	Independently authenticated read-back
CLOUD LOGGING / CORRELATION	Cloud Logging correlated by run id

EVIDENCED DEPLOYMENT REVISION

interlock-hac340-proxy-00002-wzf

The only deployment revision the frozen record names. Agent and target revision names are not evidenced and are not shown.

TRANSPORT PROVENANCE

oidc-id-token/platform-verified:email

Cloud Run IAM establishes transport identity. It does not prove application-role semantics.

APPLICATION / RECEIPT PROVENANCE

sha256:9d0fa49385d17feaa2fd5...

Interlock decision and receipt. Distinct from transport provenance.

THESE DO NOT COLLAPSE

Cloud Run IAM establishes transport provenance. It does not establish Google-managed proposer, reviewer or authorizer roles inside Interlock.

ABSENT FROM THIS DEPLOYMENT

Agent Runtime Agent Gateway CONTENT_AUTHZ

Frozen evidence: interlock-hac340-proxy-00002-wzf

Non-claim: service accounts establish transport provenance only; internal Interlock roles are not Google-managed identities
