

Claim boundary

CONTROLLED LOCAL EXPERIMENT HAC - 330 - A bounded causal experiment: revision-bound environment evidence changes the coordination decision and the joint outcome.	GOOGLE CLOUD PARTICIPATION HAC - 340 - One recorded Gemini + Google ADK + Cloud Run traversal through Interlock. - A receipt-bound protected mutation, independently read back, correlated in Cloud Logging. - Three recorded fail-closed refusals.	NOT CLAIMED ✗ HAC-330 did not run on Google Cloud ✗ HAC-340 does not reproduce the 140/120 counterfactual ✗ Agent Runtime did not participate ✗ Agent Gateway did not participate ✗ CONTENT_AUTHZ is not on the HAC-340 path ✗ wrong-audience-token rejection is local parity evidence, not a HAC-340 cloud result ✗ HAC-316 is failed/pivoted provenance and is not a passing proof packet ✗ WITHHOLD_SERIALIZE is not human approval, joint authorization or certification ✗ ALLOW plus receipt is not an AUTHORIZED lifecycle state; no HAC-317 lifecycle vocabulary is imported ✗ no exactly-once, restart-safety or recovery guarantee is claimed (HAC-327 out of scope) ✗ no safety, security, verification or production-readiness guarantee is claimed ✗ three cloud negative controls are three controls, not comprehensive attack coverage ✗ internal Interlock roles are not Google-managed identities
---	---	--

Two runs, two proof classes. Neither is evidence for the other.
